COSCO (India) Limited is India's leading Sports, Fitness and Lifestyle brand. It was established in 1980 and got listed on the Bombay Stock Exchange (BSE) in 1994 as a public company.

We at COSCO believe in providing premium quality products backed up by efficient after sales service. We have a state of the art production facility in Gurugram, spread across 3,00,000 sq. ft. with a motivated and efficient team of over 650+ personnel covering Production, Sales, Management and Service. We have qualified Technologists and Engineers to manage production and spearhead R&D.

We also represent many International Sports and Fitness brands in India which we distribute through our strong network of over 800+ dealers pan India fed by our branch offices in Delhi, Mumbai, Jalandhar and Gurugram.

We have established a strong legacy over 4 decades with innumerable achievements, strong associations, International Approvals and National & State level affiliations.

We further aim to strengthen our commitment of giving back to the community and take pride in being socially inclined with focused and effective CSR projects.

FIFA TEST CRITERIA

Consistent Circumference
Footballs are inflated to a defined pressure and then the ball's radius is measured at defined points.

Permanent Roundness (Sphericity)
The difference between the average radius and each individual radius is measured and must not exceed a certain percentage.

Uniform rebound
Football are dropped ten times on to a plate from a height to two meters and must rebound consistently.

Minimal water absorption (Outdoor and beach soccer balls only)
Footballs are turned and squeezed 250 times in a tank full of water. The ball must not absorb too much water.

Perfect Weight
Footballs are turned and squeezed 250 times in a tank full of water. The ball must not absorb too much water.

Balance: Minimal Change of Direction (futsal only)
Footballs are turned and squeezed 250 times in a tank full of water. The ball must not absorb too much water.

Shape and size retention
The test ensures the ball's shape pressure and and circumference remain constant for the duration of a match and only applies for the top quality fifa APPROVED balls. The ball is fired 2,000 times against a steel plate at 50 kilometres per hour. The seams and air valves must remain undamaged and only minimal loss of pressure and changes in roundness and circumference are permitted.
